

NITA ENGINEERING

We Build Relation by commitment and Excellence

Nita Engineering is a Private Company incorporated in India in the year 1986 by Technocrats to manufacture Chemical, Resin and Paint related Machineries & Plants.

Nita Engineering established in 1986. The company was started by the technocrats **MR. VALJIBHAI S. PATEL**, Now **MR. SURESHBHAI V. PATEL**, inherent with his father the company's rapid progress is largely attributed to the personal skills and hard work rendered by the above Directors, the unprecedented support given by all the employees of the company and the last but not the least by the most valued customers for patronizing the products of the company from time to time.

It is situated on Odhav - KathWada highway near Village **Odhav G.I.D.C.** The factory building is designed in such a way that it can process approx. 300 yard of a series of Reactors, fully equipped with condensers, receivers, and boilers to process all kinds of Chemical, Resins and Paint Machineries. The Company markets all kinds of Chemical Machineries, Resin Machineries and Paint Machineries of international standards to multinational companies, large, medium and small scale Indian industries. It is also exporting many products to various countries.

Nita Engineering is equipped with latest Quality Control facilities to test the raw materials as well as finished products. It also has round the clock working process control laboratory, so as to make the products of consistent quality.

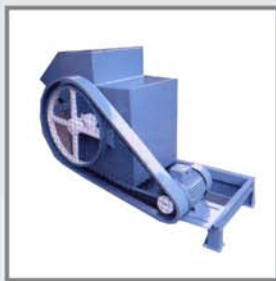

Nita Engineering is very keen to update qualities of their products and to develop newer products to keep pace with international range of products, used with added advantage of better properties at a much competitive price. The efforts of upgrading the quality of all the existing products is a continuous process of the company, based on the growing need of the customers for the higher quality of the products from time to time.

OUR VISION :

To become a premium Chemical, Resin and Paint Machinery and Plant manufacturer, manufacturing wide variety of world class technology products.

OUR MISSION :

- To provide value added products with consistent quality at reasonable price.
- To develop newer products in keeping pace with technology up-gradation.
- To win over the customers by satisfying their quality requirements.
- To become a leader in the field.
- To be fair in all dealings.
